*High frequency inductive heater is suitable for heating any metal. It is depending on different application has varies frequency, such as higher frequency, high frequency, medium- high frequency and medium frequency Inductive heater. All the devices are solid-state technology manufactured and dedicated to precision brazing, tin soldering, hardening, heating, forging and melting.*

New-HP-Cube Medium High Frequency Inductive Heater for Brazing (30-100KHz)

New-HP-Cube Medium High Frequency Inductive Heater for Forging, Brazing (30-100KHz)

New-HP-Cube Medium High Frequency Inductive Heater for Hardening, Forging (30-100KHz)
