<http://m.cens.com/s/texyear>

For the past 35 years, Tex Year has started from selling Japan adhesive to manufacturing hot melt adhesive with the environment protection concept is growing up. We always request ourselves to be the expert in bonding different interface. Besides, Tex Year also involves in heating device under the hot melt adhesive application to be the professional ODM manufacture in laminator. In past several years, we entered medical field with our heating technique and develop autoclaves. The new business filed means our serving people are increasing and the multi-heating techniques are more mature.
