*Prowill Technology CO., LTD., established in year 2000, is formed by a group of barcode professionals in both hardware and software. We are specialized in the design and integration of barcode printers, scanners, keyboards, and related peripherals.*

*In year 2004, Prowill started to research and design ARM type system and calculated software. And in year 2005, Prowill successfully cooperated with MinDe to co-develop a series of barcode related products such as, "laser barcode reader", "RF laser barcode reader", and "data collector", thanks to our new members included 2 PHD from UK, and 3 masters who just return to Taiwan for this purpose.*
