*We have been doing the Machine Tools business for more than 30 years. We were the producers of Conventional lathes, Milling machines, Machine accessories (such as Vice, Rotary table, Dividing head), and Air tools. Moreover, we still keep the partnerships with Slant bed & Teach-in CNC lathes. Actually, we have a long time experience and good reputation in this business field. Besides, we do well on the services and technical problems. Our after-sales services are very well and efficient, such as spare parts delivery, technical problems response, etc. Also, we get very good feedbacks from our customers "for soonest response".*
