<http://m.cens.com/s/i-yuan>

I Yuan has started our company in Taiwan since April in 1987. At that time, the capital is US\$ 35,000. We manufactured and have the business in the washer pumpers and washer motors. In 1993 and 2004, we expanded our product lines with cooling fan and blowers. To expand our product line and our development, we have a new product line, window regulator, and we also moved to a new factory in Taoyuan County.
