

NAN DEE PRECISION CO., LTD.

A wide range of machined and turned parts for various industries

Machining Part

Chang Loon Industrial Co., which was founded in the central Taiwan county of ChanNan Dee Precision Co., Ltd., one of Taiwan's top three makers of lathed/machined parts, specializes in turning out various kinds of high-precision items made of different materials. Founded in 1982, the company has insisted on following the principles of "Honesty, Innovation, and Constant Improvement" and has built a solid reputation for its wholehearted devotion to satisfying the needs from its customers.

The company claims that its leading-edge, trend-setting techniques and know-how allow it to complete orders for all kinds of specifications and applications, making it a supplier of total-solution machined and turned parts.

As part of its effort to become the best OEM supplier in the field, Nan Dee set up a Chinese factory in Shenzhen, Guangdong Province in 2000. This facility now employs more than 500 workers and supplies a broad range of services that greatly strengthen the competitiveness of its customers in many aspects.

Milled Parts

Nan Dee's factories in Taiwan and China registered ISO-9001 certification in 1998 and 2001, respectively. The Chinese facility acquired ISO/TS-16949 certification in 2008 and the Taiwanese plant gained the same honor in 2010. Constant improvement, the firm claims, enables it to respond simultaneously to the changing market demands.

Using precision measuring equipment together with intelligent administration and quality-control systems, Nan Dee's advanced machines and high-efficiency processes turn out CNC-precision turned parts and milled parts.

CNC Milling Part

Brass Machine Parts

The firm stresses its belief that customer growth brings growth and success to Nan Dee itself, and so it will keep striving to solve customers' problems and fulfill all of their requirements.

Precision Machined Parts

Nan Dee hopes to continue in its role as an active and creative OEM supplier no matter what challenges it may face in the years ahead. This is not just a slogan, the firm insists, but is one of its most important missions.
