The Company was established in 1987, specializes in manufacturing hydraulic vise and accessories for machine tools. The vise is uniquely designed and specially constructed, minimum bending can be obtained when maximum clamping force applied. We employ highest quality FCD55 casting as material which can tolerate deforming and bending stress. Its slideway is hardened by heat treatment to reach hardness of HRC45 degrees for excellent durability. "Quality is tantamount to our life." It is with that vision, we go forward to reach our goal of being a premier, world-class producer of quality products for overseas and domestic buyers. Hydraulic vise
