*PMI, stands for the Precision Motion Industries, Inc., is located in Taichung area of Taiwan. Taichung area is actually the central area of Taiwan. As many people know that the Taichung area is the area of Machine Tool manufacturing.*

*PMI was established in 1990 with very small capital. It was not easy to run a ballscrew manufacturing business with that small amount of capital. There was not any thread grinding machine for screw shaft of PMI....*

Rolled Ballscrew

MSA Series Heavy Load Type

MSB Series Compact Type
