

About the Environmentally Friendly Tubes (EFT)

Environmentally Friendly
Our EFT is a highly polymerized, unvulcanized rubber composite. When punctured, the molecular forms an airtight seal around the nail or glass, restoring the seal itself, giving riders extra time to react.

Ultra-lightweight
With a density of only 0.88 g/cc, our EFT is 30% lighter than traditional tubes which can have densities up to 1.3 g/cc.

Environmentally Friendly
Made from modified thermoplastic elastomer compounds (TPE), our EFT can be recycled with other TPE products, thus minimizing waste and protecting the environment.

Specifications

Valve:
Ø40mm Schrader Valve (American)
Ø50mm Presta Valve (French)

Available Sizes

20x23C-25C	26x1.95-2.25	29x1.95-2.25
20x1.35-1.75	26x2.0-2.5	700x23C-25C
20x1.95-2.25	29x2.0-2.5	700x28C-35C
20x2.0-2.5	650Bx1.35-1.75	700x35C-45C
26x1.35-1.75	650Bx1.95-2.25	MADE IN TAIWAN

30% grams
