*Founded in 1980, Water House Co., Ltd. is the first in Taiwan to produce plastic powder for plating of racks and hooks. With ample experience, we supply formula that is stable, resistant to extreme temperatures, acid, alkali, highly chemically inert, easily applicable, strongly metal-adherent and energy-efficient to help water-based ED paint to be baked on nickel, hard-chromium, bronze, verdigris, gold or K-gold plated surfaces.*
