People using the CPAP mask face the main problems such as air leakage, pressure from headgear, limited sleep position, skin irritation and nose. However, thankfully, with HSINER's advancement CPAP mask, all these difficulties have been overcome.

CPAP Mask / NV Mask

Breathing / Anesthesia Systems

HSINER offers quality breathing systems, which are open and closed circuits. They are compatible with various size of face masks, breathing bags, accessories and filters.

Disposable Manual Resuscitator

The Manual Resuscitator is designed to provide effective breathing assistance. It's simple and safe construction makes it desirable for use in acute situations. The construction helps assure easy and leak-free assembly. All connections meet ISO standards. Resuscitators are available in three different size: adult, child and infant, covering a wide range of tidal volumes.
