The C-TEK Technology Corp. has been established in 1991 with the purpose to develop PC-based controller and a variety of machine tools. We have our own R&D team to improve quality continually. In addition to Japan, we are the only one with the capability to develop software, controllers, servo drivers and motors by ourselves. In the past 20 years, we constantly launched many kinds of controllers and CNC machines including CNC Milling Machine, EDM, and Machining Center.
