Initially offering boring services when major local peers stagnated in making low-grade, large power presses, while even now leading makers still struggle to exceed 600spm, Jin How Shin has succeeded in launching hi-speed models to be a pioneer in the local business, also striving to develop 2000spm models and ones outrivling Japanese yet comparable to Swiss counterparts.

Straight-Type Single-Crank Hi-speed Precision Power Press (HS-60)

C-Type Hi-Speed Precision Power Press (CHP-35)

Straight-Type Double-Crank Hi-Speed Precision Power Press (JH-60)
