<http://m.cens.com/s/jiten>

Jiten established in 1972, with 40 years plentiful production experience. In 1978, we recommended Switzerland (SULZER RUTI) highly accurate net-weaving machines into our production line. Now we produce 1,700,000 yards per month at 5000- square-meter firm with branding "An Xia". In last two years we did chromatic analysis and studied dying techniques to develop an eco-friendly PE string that simulate straw-like hue and texture to successfully satisfy the client. Moreover, the plisse window screen with unbeatable quality and competitive prices have been hot-sellers in Japan and Europe for three years, helping raise company profile in the line.
