Founded in 1993, we are dedicated to sales of electronic parts and modules, with customers mostly in Latin America, Taiwan and other Asian countries. Recently, we have vertically-integrated material suppliers and satellite factories as well as diversified product lines to meet changing demand, not to mention customized manufacturing. We currently sell electronic parts, active, passive components, and modules, as well as handle IPO, subcontract manufacturing, material supply, inventory management. In addition we are agents of LED lighting to meet the rising eco trend.
