<http://m.cens.com/s/maxemil>

Founded in 1996, MaxEmil Photonics Corp. started as an optical design company, offering the optical system designs and consulting services. In order to service our customer from design to manufacturing, we set up a factory to produce polymer optics in the year of 2000.

We are proud of assisting our customers in developing novel and state-of-the-art solutions to optical challenges. We have extensive experience in the design and manufacturing of optical products, such as camera zoom lenses, optical pickup head, scanner, video lens and digital data projector.
