GAO SHEN FENG was established in 1978, specializing in mould design and manufacturing in early times. GAO SHEN FENG's moulds have been receiving very positive responses on lead time, quality and after service from our clients. However, the blowing machines on the market and our moulds are unable to work in the best efficiency. In order to meet clients' request for energy-saving, rapid and steady productions, GAO SHEN FENG had determined to manufacture the multiple blow molding machines ourselves.
