Hong Kong International Printing & Packaging Fair 2017 to Take Place Apr. 27-30

Trade fair to serve as one-stop shop for printing and packaging solutions

By STEVE CHUANG

The Hong Kong Trade Development Council (HKTDC) and CIEC Exhibition Company (HK) Limited present the region's leading industry platform, the Hong Kong International Printing & Packaging Fair, from 27-30 April, 2017 at AsiaWorld-Expo. The fair offers a wide spread of reputable suppliers of printing and packaging equipment, products, services and total solutions. In 2016, some 14,400 buyers from 96 countries & regions attended the fair for sourcing. In 2017, the fair is expected to welcome more than 430 international exhibitors.

Buyer Expectations Met by Exhibitors

The fair showcases Hong Kong's considerable capabilities as one of the world's leading printing/packaging centres and its position as a trading hub. Buyers will find cost-effective technology as well as value-added solutions which encompass pre-press and post-production services.

Another major buyer focus is environmental protection and the fair presents suppliers who understand the international regulations governing packaging in both the domestic and export markets, such as meeting recycling or recovery targets.

Specific Zones to Meet Buyer Needs

The De Luxe Zone caters to manufacturers and others involved in luxury goods such as jewellery, watches, cosmetics, perfumes, wine, spirits, gourmet food, gifts, fashion & accessories. They will find expert suppliers with a wide range of high quality printing and packaging options.

In 2017, the De Luxe Zone is expanded further, with premium packaging products made of innovative materials, as well as auxiliary items such as ribbons, special papers and premium films.

Green Printing & Packaging Solutions

Green Printing & Packaging Solutions welcomes buyers looking for services and supplies which make a positive contribution to the environment. Packaging which is from sustainable resources, which can be recycled or which is energy-saving gives a marketing edge and suppliers in this zone offer an impressive choice.

New Zones in 2017

Hong Kong International Printing & Packaging Fair 2017 features two new zones. "Printing and Packaging Solutions for Fashion & Accessories" will highlight printing and packaging solutions for fashion & accessories with products such as textile printing machines, labels, ribbons. Another new zone "Innovative Retail Display Solutions" will present innovative retail

display solutions, including paper display racks, visual merchandising and smart shelf solutions.

Fabulous Events Offering Abound of Market Intelligence

Seminars cover popular hot topics including digital printing, latest packaging and green solutions. Exhibitor Forums and Buyer Forums disseminate up-to-date market information for potential business opportunities. CENS

Yang Light Engineering Co.

Automotive ratchets, tie-downs, woven straps, fasteners, buckles, pulley fittings, OEM parts

Yang Light Engineering Co., established in 2005 in Changhua County, central Taiwan, is a specialized manufacturer of metallic products and parts for wide ranging applications, with two manufacturing bases totally taking up 13,000 square meters.

The versatile maker turns out a broad spectrum of hardware products and industrial parts, including automotive ratchets, tie-downs, woven straps, fasteners, zinc buckles, shackles, pulley fittings, hardware parts and components, medical equipment, telecommunications parts, motorcycle parts, auto hardware, punched, lathed and pressed products, hand tools, strap-holders for planters, overcenter buckles, truck anchor points, cam buckles, anchor points, tool bags, tail nets, ratchet tie-downs, etc., all of which are compliant with international standards as CE and UL.

The company's products are well-received by customers across as many sectors as the number of its product offering, with satisfied buyers of military vehicles, watercrafts, automotive products, agricultural equipment, leisure and sports equipment, furniture, construction and climbing equipment. Over 80 percent of the firm's output goes to Europe, North America and Japan. Some globally famous enterprises in the automotive and electronic sectors also outsource production of parts from the company either directly or indirectly, indicative of this maker's proven reputation as a world-caliber OEM (original equipment manufacturer).

To secure sustainable development and avoid the vicious cycle of underselling competition against rivals from emerging countries, the company has developed R&D technology that is not easily duplicated and production skills to shore up its ODM (original design manufacturing) business, so as to move upmarket with potentially higher margins.

The company is also notable for its extensive know-how about materials. Understanding that the quality of output is often determined to large degree by proper adjustment in production processes according to material used, the company researches and studies characteristics of various materials, hence having accumulated ample knowledge about different production techniques that suit copper, zinc alloy, tin, aluminum, stainless steel of grades ranging from 300, 400 and 500 series to 600 and 700 high-end series, special high-hardness metals, engineering plastic and high-density yarn.

Excellent production efficiency and flexibility are also the firm's core competency, achieved partly by a full slate of advanced production equipment employed in-house, including CNC machining centers, punching, forging, and die-casting machinery and large-sized electric overhead cranes, and in no small degree by many subcontractors who possess specialized technique and know-how in different fields.

Unremitting effort paid to develop strong mold developing capability helps build Yang Light's current success as well, which is key to cutting cost and raising quality and quantity of output, not to mention shortening lead-time by advancing schedule of volume production. To that end, this manufacturer dedicates most of its R&D resources to develop computer-aided 3D mold designing and rapid prototyping technologies, also updating its knowledge about mold development and mechanical engineering through periodical meetings with foreign experts. The efforts have paid off, as the company is able to develop over 200 sets of new molds per month independently and continues adding new products to its lineup.

With strong commitment to quality, Yang Light adheres to by-the-book quality control measures, such as digital quality archiving and hourly spot-checks, in compliance with the ISO and TS16949 systems. Also, the company has set up a full line of precision testing devices, including 3D projectors and hardness, impact and tension testing machines, some of which, like the newest horizontal 200t tension tester, are developed in-house for special tests and more thorough pre-delivery inspection. Noteworthy is that each independently developed testing device has been approved by SGS, thanks to the company's R&D capability.

Yang Light supplies varieties of hardware products and industrial parts, some on OEM and ODM basis

Yosin Ind. Co., Ltd.

CNC milling, CNC lathing, precision parts & components, electronic parts, auto and motorcycle parts, mechanical parts, specialty metallic valves, etc.

Founded in 1979, Yosin Ind. Co., Ltd. is a veteran company specializing in OEM/ODM manufacturing with integrated capability from parts production, processing, surface treatment, assembly to packaging. The firm is known for always sticking to the highest quality-control (QC) standards and delivering total customer satisfaction.

The versatile maker is noted for being dedicated to developing and upgrading advanced design skills backed by cutting-edge 3D computerized graphics, helping global customers with product and mold/die design, development and manufacturing.

With in-house manufacturing of computer numeric control (CNC) milling and CNC lathing, Yosin offers precision parts and components for wide-ranging applications, such as building hardware, bathroom hardware, auto and motorcycle parts, electronic parts, furniture hardware, industrial hardware, hand tool accessories, parts for gardening shears, mechanical parts, specialty metallic valves, and many others.

It specializes in processing various types of metallic materials, including aluminum alloy, steel alloy, copper alloy, titanium alloy, stainless steel, SCM440-grade engineering plastic, SCM430-grade chrome-molybdenum steel, etc.

For continued business growth, Yosin carried out a corporate restructuring in 2007 to upgrade operations to world standards with installation of advanced equipment, improved customer services, expanded versatility, and new management concepts. The company then introduced high-end machinery from industrially advanced nations, such as Japan, Germany, etc., to effectively become a top-notch player of its kind in Taiwan.

Yosin says that it welcomes global customers to place OEM/ODM orders, and is very confident in providing integrated or individual services from product design and development, to assembly and delivery.

KEVIN GEARS ENTERPRISE CORP.

Gears, Machine Parts, Helical Bevel Gears, Straight Bevel Gears, Bevel Gears, Tilt Bevel Gears, Transmission Gears

A skillful processing service provider with experience for more than three decades, we established “Lolewis Gears Enterprise Corp.” in 2001 and successfully exported our products to markets worldwide. In 2006, we expanded our factory area to the current address and renamed as “Kevin Gears Enterprise Corp.” Continuing purchasing high-end machinery to offer high-precision gears is our key to successfully penetrating products into markets in Japan and the USA. OEM/ODM orders welcome. Main products: Bevel gears, spur gears, worm gears, helical gears, industrial-duty gears, gear racks, gears for speed reducers, gears for gearboxes, transmission gears, worm shafts, gears for motors, etc. Modules: 0.3~M8
